

Harrison Wight

Full Stack Developer with experience developing scalable web applications and enterprise solutions. Skilled in modern development technologies with a passion for building user-focused software, solving complex problems, and continuously learning new tools and frameworks.

EDUCATION

Rose-Hulman Institute of Technology — *Computer Science*

August 2020 - May 2024 — Terre Haute, IN

Relevant Courses: Intro to Database Systems, Computer Graphics, Artificial Intelligence, Operating Systems, Intro to Web Programming, Advanced Web Development, Machine Learning, Data Mining, Design & Analysis of Algorithms

EXPERIENCE

Wipro — *Software Consultant*

June 2024 - Present — Remote

- Configured and maintained **Edgile Decision Engine** solutions within ServiceNow.
- Collaborated with **business stakeholders** to gather requirements, analyze business processes, and translate needs into **technical solutions**.
- Utilized ServiceNow platform capabilities to configure workflows, forms, business rules, external **API integrations**, and process automation.
- Participated in Agile development cycles, including sprint planning, documentation, and stakeholder demonstrations.

Telemetry Sports — *Full Stack Developer Intern*

June 2022 - August 2023 — Noblesville, IN

- Developed responsive web application features using **React**, optimizing application performance for improved UI/UX
- Consumed and integrated **REST APIs** to display sports analytics and user-specific data for NFL clients.
- Assisted in troubleshooting and resolving bugs, ensuring a smooth and reliable application experience.

PROJECTS

Portfolio — *Personal*

- Crafted an interactive portfolio website showcasing projects and technical expertise, with a modern UI/UX in **React**, using **Three.js**, **Framer Motion**, and **Tailwind CSS**.

RetireSimple — *Senior Capstone*

- Designed and implemented the backend engine for a retirement planning platform using **C#/.NET** and local **MongoDB**, developing scalable APIs, optimizing data storage, and supporting complex financial forecasting and retirement analysis calculations.

Flow — *Personal*

- Created a full-stack financial management application for budgeting, debt tracking, investments, and net worth monitoring.
- Constructed REST APIs and database schemas for financial data management.
- Designed analytics dashboards to visualize the “flow” of income versus spending trends
